

ARJUN VASHISHTHA

Software Management & Marketing • Data Science • AI Builder

+91 9105459616 | arjunvashishtha2004@gmail.com | Bhopal, India | github.com/arjundroid12 | arjun-portfolio-emc.pages.dev

PROFESSIONAL SUMMARY

Fourth-year B.Tech CSE student at VIT Bhopal, currently working in Software Management & Marketing at Techify Inc. Bridges product, data, and growth — coordinating software projects, building websites and applications with AI and no-code tools, and driving marketing through UGC content and paid social campaigns. Strong foundation in Python, machine learning, and data analytics, with hands-on experience building autonomous AI agents, full-stack web applications, and data-driven solutions. Passionate about shipping practical products that solve real problems.

EXPERIENCE

Software Management & Marketing

Techify Inc. | Nov 2025 – Present | Bhopal, India

- Intern (Nov 2025 – Feb 2026) → Full-time (Mar 2026 – Present)
- Manage software projects end-to-end, coordinating development priorities and delivery timelines across the team.
- Build and launch websites and applications using AI and no-code platforms, turning ideas into working products quickly.
- Plan and run marketing campaigns across Instagram, Facebook, and Google Ads to drive reach and engagement.
- Create UGC content and produce/edit video to support brand and product marketing initiatives.

KEY PROJECTS

12+ projects built across AI/ML, full-stack, frontend, and backend. Live demos and source code available on GitHub. Selected highlights:

Dungeon Portfolio (This Website)

Premium dungeon/RPG-themed portfolio with 8-layer parallax cave backgrounds, animated King character with click-triggered attack sequences, Goddess NPC with 40+ topic knowledge base, achievement system (10 unlockables), screen shake effects, ambient castle music, treasure chest loot system, RPG-style project cards with rarity borders, and animated pixel-art animals across all sections. Built with Next.js 16, Framer Motion, Lenis smooth scroll, and Web Audio API. Deployed on Cloudflare Pages.

Tech: Next.js 16, TypeScript, Tailwind CSS 4, Framer Motion, Lenis, Web Audio API, Cloudflare Pages

SmartAgro — AI Plant Disease Detection

AI system that helps farmers detect plant diseases and get remedies from image or text input. Uses CNN/Random Forest for image classification and NLP for remedy queries, with a web interface and recent-query history.

Tech: Python, CNN, Random Forest, NLP, Web Interface
github.com/arjundroid12/SmartAgro-A-disease-detection-model-with-Human-Interaction

FIOLA — AI Voice Assistant

Custom voice assistant built with LLMs and Python for speech recognition and task automation. Handles natural language commands and executes tasks autonomously.

Tech: Python, LLM, Speech Recognition

AI Agents Suite (4 Agents)

Built four autonomous AI agents: (1) Research Agent using the ReAct pattern for autonomous reasoning, (2) Multi-Agent System where 3 AIs collaborate to solve problems, (3) Data Analyst Agent that writes and executes Python in-browser via Pyodide, (4) Coding Agent — a mini v0.dev that generates HTML/CSS/JS from natural language descriptions.

Tech: Next.js, Cerebras, Pyodide, ReAct Pattern, Multi-Agent Systems

Gesture Particle Painter & Gesture Volume Mixer

Two MediaPipe Hands projects: a gesture-controlled particle painter (paint with hand movements, mouse fallback) and a volume mixer controlled by hand height, pinch-to-mute, and two-hand dual-channel control.

Tech: MediaPipe Hands, Web Audio API, Canvas API, JavaScript

Realtime Chat & Realtime Whiteboard

Multi-user real-time applications built with Socket.io: a multi-room chat with typing indicators and online user list, and a collaborative whiteboard with shared canvas, colors, brush sizes, and undo functionality.

Tech: Node.js, Express, Socket.io, WebSockets, Canvas API
github.com/arjundroid12/realtime-chat

JWT Auth Demo & URL Shortener API

Production-style backend projects: JWT authentication with bcrypt password hashing, refresh tokens, and token rotation; REST API for URL shortening with click analytics, custom aliases, and expiry support.

Tech: Node.js, Express, JWT, bcrypt, LowDB
github.com/arjundroid12/jwt-auth-demo

Frontend App Suite (6 Apps)

Six vanilla JS applications with live demos: Calculator (custom expression parser), Notes App (custom markdown parser, tags, search), Weather App (Open-Meteo API, 5-day forecast), Kanban Todo (drag & drop), Movie Explorer (search, filters, favorites), Pomodoro Timer (stats charts, notifications). All deployed on surge.sh.

Tech: Vanilla JavaScript, HTML5, CSS3, localStorage, Chart.js, various APIs
github.com/arjundroid12 (see repos)

CORE SKILLS

Data Science & Machine Learning: Python (Pandas, NumPy, scikit-learn), CNN, Random Forest, NLP, exploratory data analysis, model building & evaluation

AI Engineering: Cerebras, OpenAI API, ReAct Pattern, Multi-Agent Systems, Pyodide, LLM integration

Web Development: JavaScript, TypeScript, React, Next.js 16, Node.js, Express, Tailwind CSS, Framer Motion, Three.js

Data & Analytics: Power BI, MySQL, Excel, data cleaning & preprocessing, data visualization

Software & Product: Project coordination, AI website building, no-code app development, REST API design

Marketing & Content: UGC content creation, social media advertising (Instagram, Facebook, Google Ads), video editing & videography

Tools & Platforms: Git, GitHub Actions, Vercel, Render, Cloudflare Pages, Three.js, MediaPipe, Web Audio API

EDUCATION

B.Tech in Computer Science & Engineering

VIT Bhopal University, Bhopal | 2023 – 2027 | Fourth Year (Undergraduate)

INTERESTS

Music (vocalist & flutist), videography, content creation, social media, and game development. Active GitHub contributor with daily coding challenges auto-committed via GitHub Actions.
